

a penguin
standing next
to a fireplace...

BUT IS THIS THE RIGHT PLACE FOR IT?

Let's put everything in its right place:
with our city's **New Waste Sorting system**
we can turn waste into a great resource

**Brescia's New Combined Door-to-door
Waste Collection System
presents two new features:**

1

Access-protected bins for organic waste
and unsorted waste,
to be operated by means of a personal smart card

HOW DOES THE NEW
SYSTEM WORK?

2

Door-to-door collection for paper,
plastic, glass and metal

PERSONAL SMART CARD

The function of the smart card is to open the access-protected waste containers.

The smart card is for personal use only; it is supplied to all adult residents and is identified by a personal code.

The personal code is associated with the **user code** identifying the card holder's family.

Organic waste and unsorted waste may be dropped off at any time in the **new access-protected containers standing in the street.**

It is very important for organic waste to be placed in biodegradable compostable bags of the same size and type as those supplied with the

start-up kit.

Unsorted waste may be placed in any type of bag (for example ordinary plastic shoppers).

Always remember to **carry your smart card with you**, so that you may open the bin to drop off your bags of waste.

THE NEW ACCESS-PROTECTED DROP-OFF WASTE CONTAINERS

UNSORTED
WASTE

ORGANIC
WASTE

Paper, glass, metal and plastic will be collected **on a door-to-door basis** once a week.

The household bins used for door-to-door collection must be placed on the curbside on the day and in the hours indicated on the calendar supplied together with the waste collection kit.

Check the waste collection day on the flier displayed in your condominium building.

If, on the other hand, condo bins are in use, dispose of your waste in these bins whenever convenient, so long as they are put out on the collection day specified.

HOUSEHOLD BINS FOR DOOR-TO-DOOR COLLECTION

PAPER
waste will be collected between 23 and 6 h

GLASS METAL
waste will be collected between 21 and 1 h

PLASTIC
waste will be collected between 23 and 6 h

HOW DOES THE
ACCESS-PROTECTED WASTE
CONTAINER WORK?

-
- 1 **Waste compartment:** sized to contain a maximum volume of 20 litres, it can only be opened by placing the smart card alongside the lid
 - 2 **Display:** through a series of icons, it explains how to drop off your waste and report any access or card malfunctions
 - 3 **Electronic locking device**
 - 4 **Closing lever:** closes the waste compartment.

HOW TO USE IT

ORGANIC WASTE

ORGANIC WASTE MUST BE DROPPED OFF IN THE BROWN ACCESS-PROTECTED CONTAINER

Organic food waste must be placed in the brown access-protected street containers, inside compostable biodegradable bags whose size will not obstruct the waste compartment, similar to those supplied with the start-up kit.

WHAT TO DISPOSE OF

raw or cooked leftover food, fruit and vegetable skins and waste, fish and meat waste including bones, pasta and flour-based products, bread, rice, fruit stones and pips, shells (of eggs, walnuts, hazelnuts), camomile and tea bags, coffee dregs, corks, used paper napkins and tissues dirtied with food residue, greasy pizza cartons.

WHAT NOT TO DISPOSE OF

lawn and hedge cuttings, garden waste (grass, leaves), animal faeces, food packaging paper (greaseproof, plastic-coated or aluminium), cigarette butts, liquids, oils, chemical products, nappies and sanitary towels, rags, wood, ashes (from fireplaces or barbecues), animal litter.

To report any malfunctions, please call

**Toll-free number
800 766625**

It is forbidden to tip rubbish outside the bins, even if contained in perfectly sealed bags.

UNSORTED WASTE

REMEMBER:

the waste compartment has a volume of around 20 litres, which is equivalent to the size of a shopping bag.

To limit the amount of waste you dispose of, remember to reduce its volume.

UNSORTED WASTE MUST BE DROPPED OFF IN THE GREY ACCESS-PROTECTED CONTAINER

All non-recyclable waste must be dropped off in the grey access-protected street containers, placed in sacks whose size will not obstruct the waste compartment.

WHAT TO DISPOSE OF

greaseproof paper or sandpaper, broken plates and ceramic ware in general (in small quantities), non-electronic plastic toys without batteries, CDs, DVDs, music cassettes and video cassettes, vacuum cleaner filters and disposable bags, babies' nappies, sanitary towels, animal faeces, sticking plasters, disposable razors, cigarette butts.

WHAT NOT TO DISPOSE OF

batteries, oils, drugs, dangerous substances and their containers (glue, paint, solvents, insecticides), low consumption and neon light bulbs, all types of recyclable waste.

It is forbidden to tip rubbish outside the bins, even if contained in perfectly sealed bags.

PAPER

PAPER GOES INTO THE BLUE BIN

Paper and cardboard must be placed in the blue household bins or in the blue condo bins supplied with the start-up kit.

No other container of the user's choice may be used for this purpose.

WHAT TO DISPOSE OF

newspapers, exercise books and magazines (without any adhesive, metal or plastic parts), Tetra Pak packaging (of the type used for milk, fruit juice and other beverages), paper bags, cardboard tubs and trays for food, cardboard packaging for toys and clothing, pizza cartons without any residual food attached.

WHAT NOT TO DISPOSE OF

dirty paper with food residue, fax paper or non-carbon copy paper, receipts, greaseproof paper, plastic-coated cards, cellophane wrappings, pizza cartons with residual food attached, plastic bags.

Check the calendar supplied with your bin kit to know the collection day in your area

GLASS AND METAL

GLASS AND METAL GO INTO THE GREEN BIN

Glass and metal must be placed in the green household bins or in the green condo bins supplied with the start-up kit.

No other container of the user's choice may be used for this purpose.

WHAT TO DISPOSE OF

bottles, glasses, jars, glass vases and carafes, aluminium foil food containers for storage and freezing, tins and tubes for food, cans used for beverages and liquids, aluminium foil, jars, metal coat hangers, metal bottle caps, aerosol spray without the hazard* label, coffee pots.

WHAT NOT TO DISPOSE OF

ceramic plates and cups, incandescent and low consumption light bulbs, neon tubes, mirrors, ceramic glass containers (such as Pyrex) or ceramic ware, crystal glasses and objects, plastic bags, window pane glass, car window glass, the glass of car headlights, glass packaging used to contain medicines, television tubes, TV screens, monitors, stones, building materials, aerosol spray cans labelled with the hazard* symbol.

Check the calendar supplied with your bin kit to know the collection day in your area

REMEMBER:

to empty, rinse and/or clean the containers

** dangerous, toxic, inflammable or corrosive*

PLASTIC

PLASTIC GOES INTO THE YELLOW SACK

Plastic packaging materials must be placed in the yellow sacks provided with the start-up kit. No other container of the user's choice may be used for this purpose.

Check the calendar supplied with your bin kit to know the collection day in your area

WHAT TO DISPOSE OF

bottles used for mineral water, milk, beverages and oil, bottles and dispensers for detergents, soap and cosmetics, sauce, cream, yoghurt and ice-cream tubs, food trays (in PET, polystyrene and polypropylene), blister packs and other pre-shaped packaging, bags and packs for pasta, potato crisps, sweets, vegetables and frozen foods (including those with an inner silver lining), fruit and vegetable nets, transparent film, retail bags and carriers, garden product sacks, containers for animal detergents and foodstuffs; small pots used for the sale and transportation of flowers and plants, materials for protecting and carrying merchandise (film, bubble wrap, polystyrene chips), disposable plates and glasses (with no residual food), all-plastic coat hangers, plastic fruit and vegetable crates.

WHAT NOT TO DISPOSE OF

toys, trainer shoes, plastic shoes, mats, plastic furnishings and artefacts, DVDs, CDs, music and video cassettes, photographs and photographic film, pens, umbrellas, disposable razors, jerry cans, buckets, toothbrushes.

WARNING:

Tetra Pak containers for liquid products are not to be placed in the yellow sacks but in the blue sacks together with paper waste.

REMEMBER:

to empty, rinse and/or clean the containers before flattening them

There's a place for any type of waste,
even granny's old cupboard
or the grass cuttings.

To dispose of hazardous household waste, you can use the **Ecocar**. This vehicle goes around the main city markets and stops off at other densely frequented spots according to a pre-established timetable. Users can take their waste to the Ecocar, choosing the most convenient time whenever the vehicle is in their area.

WHAT TO DROP OFF

expired or unused medicines, mineral and vegetable oils, batteries, car batteries, neon tubes, fluorescent light bulbs, monitors, small television sets, mobile phones, electric blenders, hair-driers and other small domestic appliances, containers used for products marked hazardous* such as paint, insulating materials, ammonia, insecticides, disinfectants, toners.

WHERE TO FIND THE ECOCAR

On the site www.differenziatabrescia.it, in the Area Services section, you can consult the places and dates when the Ecocar is closest to your home.

* Containers of hazardous household waste

These are the containers of toxic or inflammable household products such as: paint, ink, pesticides, insulating materials, detergents, car maintenance products, do-it-yourself and gardening products.

On containers of hazardous waste you will see these symbols:

TOXIC
fly killers, acids, thermometers, bactericides, enamel paints, freezing products, rat poison, weed killers, insecticides, caustic soda, disinfectants.

IRRITANT
bleach, ammonia, trichloroethylene, nitro-synthetic enamel paints, turpentine, car detergents, stain removers, glue, car body paints, mastic, thinners, adhesives.

INFLAMMABLE
aerosol sprays, stain removers, solvents, zinc-based anti-rust, glue, enamel paints, nitro-synthetic enamel paints, anti-mist agents, thinners, gloss paint for furniture, ethyl alcohol for liquors, car polish.

CORROSIVE
batteries, acids, chemical drain cleaners.

To dispose of voluminous waste, such as furniture and domestic appliances, a collection service is available free of charge subject to prior booking.

You can **book** by calling the **Toll-free number 800 437678**, from Monday to Friday from 8 to 20 h and on Saturday from 8 to 15 h. On the agreed day and time of collection, the items to be disposed of must be placed on view on the curbside or pavement, in a place that is accessible to the collection vehicle. No more than 4 items may be collected at one time. It is not possible to clear out cellars, attics or other rooms.

VOLUMINOUS WASTE

BATTERIES AND MEDICINES

Used batteries may be dropped off in the special containers distributed throughout town on the premises of retailers, schools and public departments. Alternatively, they may be taken to the Ecocar or to the waste separation and recycling platform.

Expired medicines may be dropped off in the special containers located at chemist shops throughout town. Alternatively, they may be taken to the Ecocar or to the waste separation and recycling area.

USED CLOTHING

If clean and still in good condition, all types of clothing may be dropped off in the yellow curbside containers distributed around town. These containers are managed by non-profit organizations which, with the aid of voluntary workers and cooperative societies, arrange to empty them and reuse their contents.

To dispose of plant waste deriving from hedge pruning and lawn mowing operations, there are special green containers distributed throughout the municipal district. These so-called Green Service containers, are in recycled plastic and are 120 cm high to facilitate the disposal of vegetation, which must be dropped straight into the containers, **without using plastic sacks.**

GREEN SERVICE

WASTE SEPARATION AND RECYCLING PLATFORMS

are specially equipped, manned areas where the following types of waste may be dropped off:

- **voluminous waste** : furniture (wardrobes, tables, armchairs, sofas, bed frames, chairs), items of various types (mattresses, cookers, boilers, house plants), voluminous waste not produced within the home (bicycles, dinghies, other types of scrap metal), voluminous waste produced by minor renovation jobs (doors, windows, roller blinds, fitted carpet, washbasins)
- **discarded durable goods**: refrigerators, freezers, deep freezers, television sets, computers, washing machines, dishwashers, air

** dangerous, toxic, inflammable or corrosive*

At present there are five waste separation and recycling platforms in Brescia. There are plans to open **two new platforms** comprising two **Reuse Centres**.

In these new areas, it will be possible to **drop off, deposit and withdraw used goods**, which may be reused without any need for repair, helping in this way to reduce urban waste.

The goods collected in this way may be donated to non-profit organizations or destined to be sorted and disposed of at the municipal waste separation and recycling platforms.

conditioning units

- **building waste** (rubble, sanitary fixtures)
- **used batteries**
- **plant waste and cut vegetation**
- **low energy fluorescent light bulbs** (to be disposed of intact)
- **car batteries**
- **cooking fats and oil**
- **used toner cartridges**
- **tyres**
- **used mineral oils**
- **sheets of glass**
- **iron** (pieces of disassembled furniture, small objects)
- **wood** (planks, furniture parts, wooden crates)
- **products and containers labelled with the hazard symbol**
- **paints and varnishes**

REUSE CENTRES

(in the pipeline)

In particular, the Reuse Centres will handle these goods:

- **wood furniture**
- **toys**
- **clothing and footwear**
- **dishes and flatware**
- **electrical appliances and tools**

VIA METASTASIO
(Fiumicello district)

VIA COLLEBEATO

only Via Chiappa:

from Monday to Friday non-stop
8.00 am - 6.00 am, Saturday 8.00 am - 1.00 pm

...a moka coffee pot
can be made from 37 cans

WHAT CAN OUR WASTE BE

...a new glass bottle
can be made from
7 glass jars

...soil for growing plants and flowers
can be obtained from kitchen waste

...a watering can may be made out of 5 plastic bottles

Be turned into?

Thanks to the new Waste Sorting scheme we can bring our waste back to life. Correctly sorted materials may be recovered and recycled, to become new objects. You may not know that...

REMEMBER:

before throwing anything away (for example, books, clothing or phones) consider that it may be useful to someone else.

The **PULlamo** app enables users to check out the urban sanitation and waste management services available in their immediate area and for any other city address of interest to them (more than one address may be memorized).

The app supplies the following information:

- **waste collection days**
- **location of the waste separation and recycling platforms**
- **street cleaning days**
- **the possibility to identify the correct waste container using the search engine WHERE TO PUT IT**
- **the possibility to report anomalies** (fly-tipping, overflowing rubbish bins, discarded syringes) with attached photograph showing geolocation details
- **the possibility to request collection of voluminous waste**
- **schedule and whereabouts of the Ecocar**

On the site www.differenziatabrescia.it information regarding the New Waste Sorting system will be constantly updated. Check it to find out when **the new service will reach your area.**

Use the **WHERE TO PUT IT** service to learn how to correctly sort all types of waste.

Also available:

- **waste collection times**
- **location of the nearest waste containers** and containers for dropping off special waste (medicines, batteries, green service garden waste)
- full information on the **waste separation and recycling platforms**
- **schedule and whereabouts of the Ecocar**

REPORTS AND REQUESTS

Help us keep the city clean by using the special form to report illegal waste dumping, overflowing rubbish bins and discarded syringes.

If you need further information, you may fill in a detailed request form online.

This manual contains
useful indications for
**correctly handling
and disposing of
waste**

when in doubt or in need of further information:
